

# Safety Film

SolarSafe and Secure provides Armorcoat® films which are a robust pairing of our Solar Control and Clear Safety films. These films provide resilient layers of high-tensile strength Mylar with aggressive adhesives for impact resistant security.

Armorcoat® Safety and Security Films for Residential and Commercial Buildings ensure protection for you and your property. These window films are applied directly to the interior of the glass securing the glass in place in the event of vandalism, small projectile intrusion during storms, or bomb blast shock waves. When applied, these safety and security window films will dramatically reduce damage, loss of property and injury from flying shards of glass.

Our Armorcoat® Safety and Security Films can be installed with or without our factory tested “Wet glaze” caulk systems for added strength.

In addition to safety, these protective films are virtually invisible thus maximizing clarity through windows and blocking out everything but the view.
